Education

BE, Computer Engineering: PES Modern College of Engineering Pune	CGPA: 8.43/10	2021 - PRESENT
Class 12, HSC: K.T.H.M. College Of Engineering	83.08 %	2018 – 2020
Class 10, SSC: Sindhu Sagar Academy	89.6 %	2017-2018

Experience

Android Developer at Oasis Infobyte   📅 Aug 2023 - Sept 2023
- As an Android Developer at **Oasis Infobyte**, I developed multiple projects including a To-do List app, Unit Converter, and Calculator using HTML, CSS, Java, and JavaScript,
- These experiences provided me with valuable hands-on experience in mobile app development, UI design. I gained a deep understanding of frontend development and honed my skills in crafting user-friendly interfaces. Through these projects, I also learned to collaborate effectively in a team setting, delivering high-quality apps without any backend support.

Full Stack Web developer Intern at Bharat Intern   📅 January 2024 - February 2024
- As a Full Stack Web Developer Intern at Bharat Intern, I worked on projects including a Money Tracker Web App and Dynamic Registration Form using HTML, CSS, and JavaScript and Node.js for backend and MongoDB for database.
- My role involved collaborating with a dynamic team to deliver high-quality web solutions, showcasing my proficiency in web development and problem-solving skills. I gained comprehensive experience in both front-end and back-end development, creating robust and efficient web applications.

Web Developer at Oasis Infobyte   📅 Feb 2024 – March 2024
- As a Web Developer Intern at Oasis Infobyte, I worked on projects including a Calculator, Tribute Page, To-do Web App, and Login Authentication System.
- I gained valuable experience in front-end development and creating secure, interactive web applications.

Projects

Weather Forecast System   ○ **Github**
- Developed a Weather Forecast System using HTML, CSS, and JavaScript, utilizing VS Code as the IDE. This project enhanced my skills in front-end development and real-time data integration.
- This interactive web application features a user-friendly interface and an information page for weather of any location using API. Notably, users can get weather information for any location simultaneously on a single web page, gaining valuable insights into their daily forecast.

Money Tracker WebApp   ○ **Github**
- Developed a Money Tracker WebApp using HTML, CSS, and JavaScript, with VS Code as the IDE. This project improved my skills in front-end development and financial data management.
- Our site provides a very simple interface for individuals having problem with expenses tracking, with a focus on sequence of tracking. Also can get the total expense at the end and can set a limit to the expenses.

Dynamic Registration Form   ○ **Github**
- Created a dynamic Registration Form using HTML, CSS, and Node.js, with MongoDB as the database. This project enhanced my expertise in full-stack development and database integration
- The data of registration form can be accesses from the MongoDB database.
